- Gulp/Webpack

Back end

- PHP
- Node.js
- MS SQL/MySQL
- Windows Server/IIS

Frameworks

- Laravel
 - Express
 - Bootstrap
-

Relevant Experience

Web Developer - Barcadia Media *(2015 - present)*

I am one of two in-house developers working in tandem to build and maintain web applications related to the UK Finance industry. To begin with my role was front end focused but has grown to be full stack whilst learning from the senior developer. The role includes technologies such as Windows Server, MS/MySQL, PHP, Laravel, es6, jQuery and CSS. Further responsibilities include building HTML email campaigns as well as providing general IT support to the office. My daily workflow is often 'ad hoc' requiring me to switch between working on long-term projects, quick feature additions and hotfixes to live applications both internally and for clients.

Freelance Web Developer - Buxton Web Design Ltd. *(2015)*

Acted in a support capacity working on Wordpress websites; with a primary focus on improving user experience (UX) via CSS and Javascript.

Freelance Web Developer - BBPN Ltd. *(2014 - 2015)*

The role mainly involved maintaining and adding functionality to Wordpress websites owned by the company.

Education

Lancaster University *(2011 - 2014)*

BSc (Hons) in Computer Science - First Class Honours

Blackpool and Fylde College (2009 - 2011)
IT Practitioner BTEC Diploma (Distinction)
